Common law source list

Today, identifying relevant common law citations demands careful research of both traditional sources and new online sources. CompuMark is leading the way with expert research of today's brand-rich common law sources – including general and industry-special online databases and websites, business name databases, industry-special directories, catalogs and buyers guides, and more. We continually evaluate the common law landscape,

uncovering cutting-edge sources of trademark information to ensure the most comprehensive search – and the most relevant results.

The common law landscape is continually evolving. CompuMark's innovative, ongoing approach to selecting and searching common law sources keeps you ahead of the curve. So you can be more certain.

Examples of CompuMark UK, Australian & Canadian common law sources include: Mintel Global New Products.

Web common law sources are continuously being updated by our team of specialists and are being added to the Common Law research.

¹ Phonetic & Orthographic Computer Analysis (POCA)

- Our authentic POCA Searches help determine if proposed drug names may encounter difficulty passing the FDA or Health Canada safety evaluations conducted on new drug names. Each reported name includes the similarity ranking % score to identify potential drug name rejections by the health regulatory agencies.
- U.S. searches cover Drugs@FDA and RxNorm.
- Canadian searches cover Canadian Drug Products Database (DPD) and Canadian Licensed Natural Health Products Database (LNHPD).
